Complaint Details - From Web

Utility Name: Alliant Energy

Are you subject to disconnection? No If yes, when?

Have you contacted the utility regarding this issue? No If yes, when?

If yes, name of person you dealt with at the utility:

Complaint Narrative: My comments are in regard to PSC Docket 5-EI-148: Investigation on the Commission's Own Motion Regarding Advanced Renewable Tariff (ARTs) Development

I would like to see an the price paid stay the same in relation to the retail price of electricity. what I mean is if the utility is paying say 9 cents for renewable energy and that utility goes in for a rate increase of 5% then the renewable price paid to the customer would go up by 5% that would create parity.

I also would like to see if in some cases where utilities are not paying a decent but back rate. if we could some how stell the energy to the utilite and the green credits to another company and the carbon credits to another the make up the difference.

thank you for your intrest Duane Hanusa
